One Sexy Little Profile

INTRODUCING The Profile Series™

A profile
more than
13mm lower!

See how efficient, easy and cost-effective battery maintenance can be. Battery Filling Systems offers a full line of products and services, including:

- Single-point watering systems
- Water delivery systems
- Water purification systems and accessories
- Training and support

LOWER PROFILE

The new clip-in low profile valve is 13mm shorter than traditional valve allowing easy access to the battery, The low profile drastically reduces wear and tear on your watering system.

ENCAPSULATED FLOAT

Designed with encapsulated floats, snap-in float guards are now completely eliminated! The low profile valve protects the float without fear of being accidentally removed.

DESIGN BENEFITS

Three years in design and testing, Battery Filling System's new low profile valve is constructed of the highest quality materials that continue to keep all working parts above the battery cell. The low profile valve works with high or low pressure, has a hydrometer port and a built-in water level indicator. The new clip-in design makes installation of systems much easier. It has the same great internal working features in the new design. It includes the patented lever arm that shuts off the water flow to maintain precise electrolyte levels and a water trap to prevent dangerous hydrogen gas movement from cell to cell.

PROVEN RESULTS

With over forty years experience designing water delivery technology, Battery Filling Systems offers a full five year warranty on every valve. We are confident in the quality and performance of our products. Not only do we warrant our valves for a full five years, but if they cause a cell failure, we'll cover the cell as well. That's Confidence – Guaranteed!

ORDERING INFORMATION

To make installation even easier, you provide the battery dimensions and battery type – and we'll provide a fully assembled kit! All you have to do is push the valves into the cells and the system is installed! It just doesn't get any easier than that!
