

SPSS

Small Parts Storage Systems- Vertical Lift Modules

It All Adds Up To VALUE

If you're deciding on an affordable, automated vertical lift storage solution for inventory management and small parts picking *decide on Lauyans.*

Lauyans & Company, Inc.

 USA Manufactured

Vertical Storage Manager (VSM) Software for the Lauyans' SPSS Systems

The Lauyans & Company Small Parts Storage System (SPSS) vertical lift modules comes equipped with our standard control and drive system. But when you need more functionality, Lauyans offers an optional inventory control and order processing software package. Vertical Storage Manager (VSM) Software by Com-Tech Systems, Inc., a leader in industrial software systems, is available as an optional package for the SPSS.

The VSM Software is *user-friendly with broad capabilities at the lowest price in the industry*. Here are more reasons why SPSS and VSM Software together *Add Up To VALUE*.

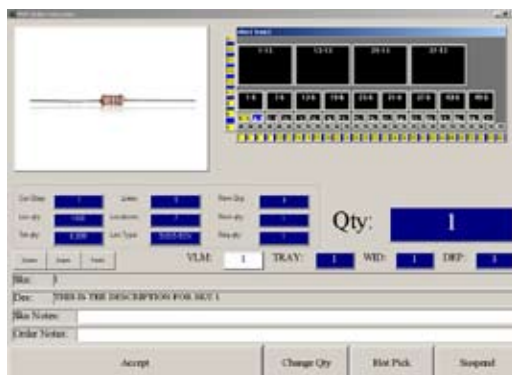

- Easy installation and maintenance with minimal training required
- Basic and advanced VSM software packages available depending on your needs and budget
- Visually displays parts, trays and locations
- Order selection or simple hot pick, hot replenishment plus order suspension
- Provides alerts for inventory shortages prior to starting order picking
- Can view storage levels at a glance
- Selection errors dramatically reduced
- Barcode verification uses part numbers and location
- One software license manages up to 24 automated vertical storage lift modules
- VSM software easily integrates with multiple brands of automated vertical storage systems
- Other hardware, such as scanners, printers, weigh scales, can be added quickly and easily

Display of *Tray Conditions* in a vertical lift module unit

Step Through *Tray Displays*

Order Selection Screen: User friendly with broad capabilities. Additional VSM software standard features include: cycle counting, expiration dates, location access control, label printing, batch order selection, host attach support, security levels, unlimited akas, bill of material, kitting, etc.

On screen *Command Keyboard* displays individual trays
