Big Power, Small Package

Affordable, Fast & Flexible, It Changes Everything!

The SI Mighty MAC™ (Patent Pending) will change how you plan, manage, and grow your warehouse distribution operation. SI Systems, the company that specializes in automating split- and full-case picking operations, brings a new level of ingenuity to a wider market: The SI Mighty MAC™ serves small, medium or large operations with equal ease.

Design Break Through

A completely new concept in warehouse distribution, the SI Mighty MAC™ is

- Portable
- Wireless
- Plug and Play
- Affordable
- Scalable

Tough Challenges, Solved.

Just roll it up to your conveyor and this compact dynamo affordably solves the toughest warehouse challenges:

- Seasonal or promotional volume bursts
- Squeezes more volume out of tight warehouse space
- Increases picking efficiencies without increasing employees
- Warehouse distribution operations can grow affordably; SI Mighty MAC™ can be added as needed.

No Major Investment.

Now for a fraction of the price, you can have what highly automated systems provide: high-speed automation that increases picking rates through your operation without the major capital investment. Start with a single 16-channel unit and add more units as you need them, when you need them. Never has there been a more flexible automated warehouse distribution solution.

Ready When You Are!

The SI Mighty MAC™ is ready out of the box. No months of planning and installation. Unpack it, roll it up to your conveyor, and just plug it in to a 110-volt outlet. No special cabling required. Its wireless operation and easy software integration will have you up in running in no time.

Fast, Flexible, Powerful

The SI Mighty MAC™ works side-by-side with manual, pick-to-light, carousel, and traditional A-Frames. Each SI Mighty MAC™ can dispense up to 2,000 pieces per hour. Just imagine what a fleet of SI Mighty MAC™ can do for your operation. Put the SI Mighty MAC™ system to work automating your fastest moving product and relieve the pressure from your manual picking operation today. It supports conveyors from 14" to 32" in height. And its compact footprint means that it fits nicely in tight spaces and stows easily when not in use.

Make it Mightier!

Pair the SI Mighty MAC™ with Synthesis™ Picking Director and achieve even greater efficiencies! Add the rest of the Synthesis™ Warehouse Control suite for a complete order release to order shipment solution for your system.

*Improve your picking operations
in less than a month!*
